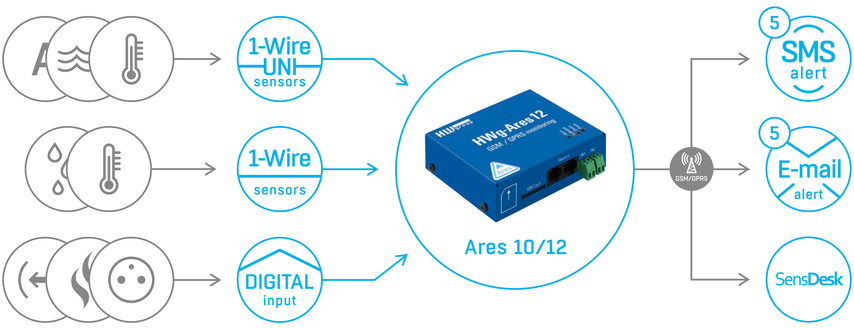
Ares 10/12

Ares monitors the readings of connected sensors. When a value reaches the alarm threshold, the device sends an e-mail or SMS or dials up to 5 pre-defined numbers.



HW group s.r.o. is a Czech technological company focused on development, production and distribution of solutions for remote monitoring, alerting and control via LAN, WiFi and GSM, which match the latest demands of industrial use. The company is active since 2003 and supplies its products to more than 40 countries worldwide.

Poseidon2 4002

Secure solution for remote environment monitoring and control of outputs.

Poseidon2 3468

Remote monitoring and control for industrial applications with 230 V / 16 A relay outputs.

Poseidon2 3268

Remote monitoring of sensors and detectors and control of relay outputs.

Poseidon2 3266

Cost-effective model for remote monitoring of sensors and detectors.

Damocles2 2404

Secure industrial I/O device with PoE and Telco -48 V power options.

Damocles2 1208

Industrial I/O with enhanced IP security and QC connectors.

Damocles2 MINI

Smart I/O controlled over Ethernet.

STE2

WiFi and Ethernet temperature and humidity sensor with digital inputs.
