

Damocles2

Damocles2 devices are designed to monitor and control digital I/O over the network using secure M2M protocols.

* Depending on the particular model of the Damocles2 series.

HW group s.r.o. is a Czech technological company focused on development, production and distribution of solutions for remote monitoring, alerting and control via LAN, WiFi and GSM, which match the latest demands of industrial use. The company is active since 2003 and supplies its products to more than 40 countries worldwide.

Poseidon2 4002
Secure solution for remote environment monitoring and control of outputs.

Poseidon2 3468
Remote monitoring and control for industrial applications with 230 V / 16 A relay outputs.

Poseidon2 3268
Remote monitoring of sensors and detectors and control of relay outputs.

Poseidon2 3266
Cost-effective model for remote monitoring of sensors and detectors.

Ares10
Cost-effective GSM thermometer with remote management and alerts sent by e-mail, text messages or by dialing a number.

Ares12
Industrial measuring and monitoring for 14 sensors with GSM communication and back-up power.

IP WatchDog2 Industrial
Industrial watchdog that checks devices for heartbeat over Ethernet and RS-232.

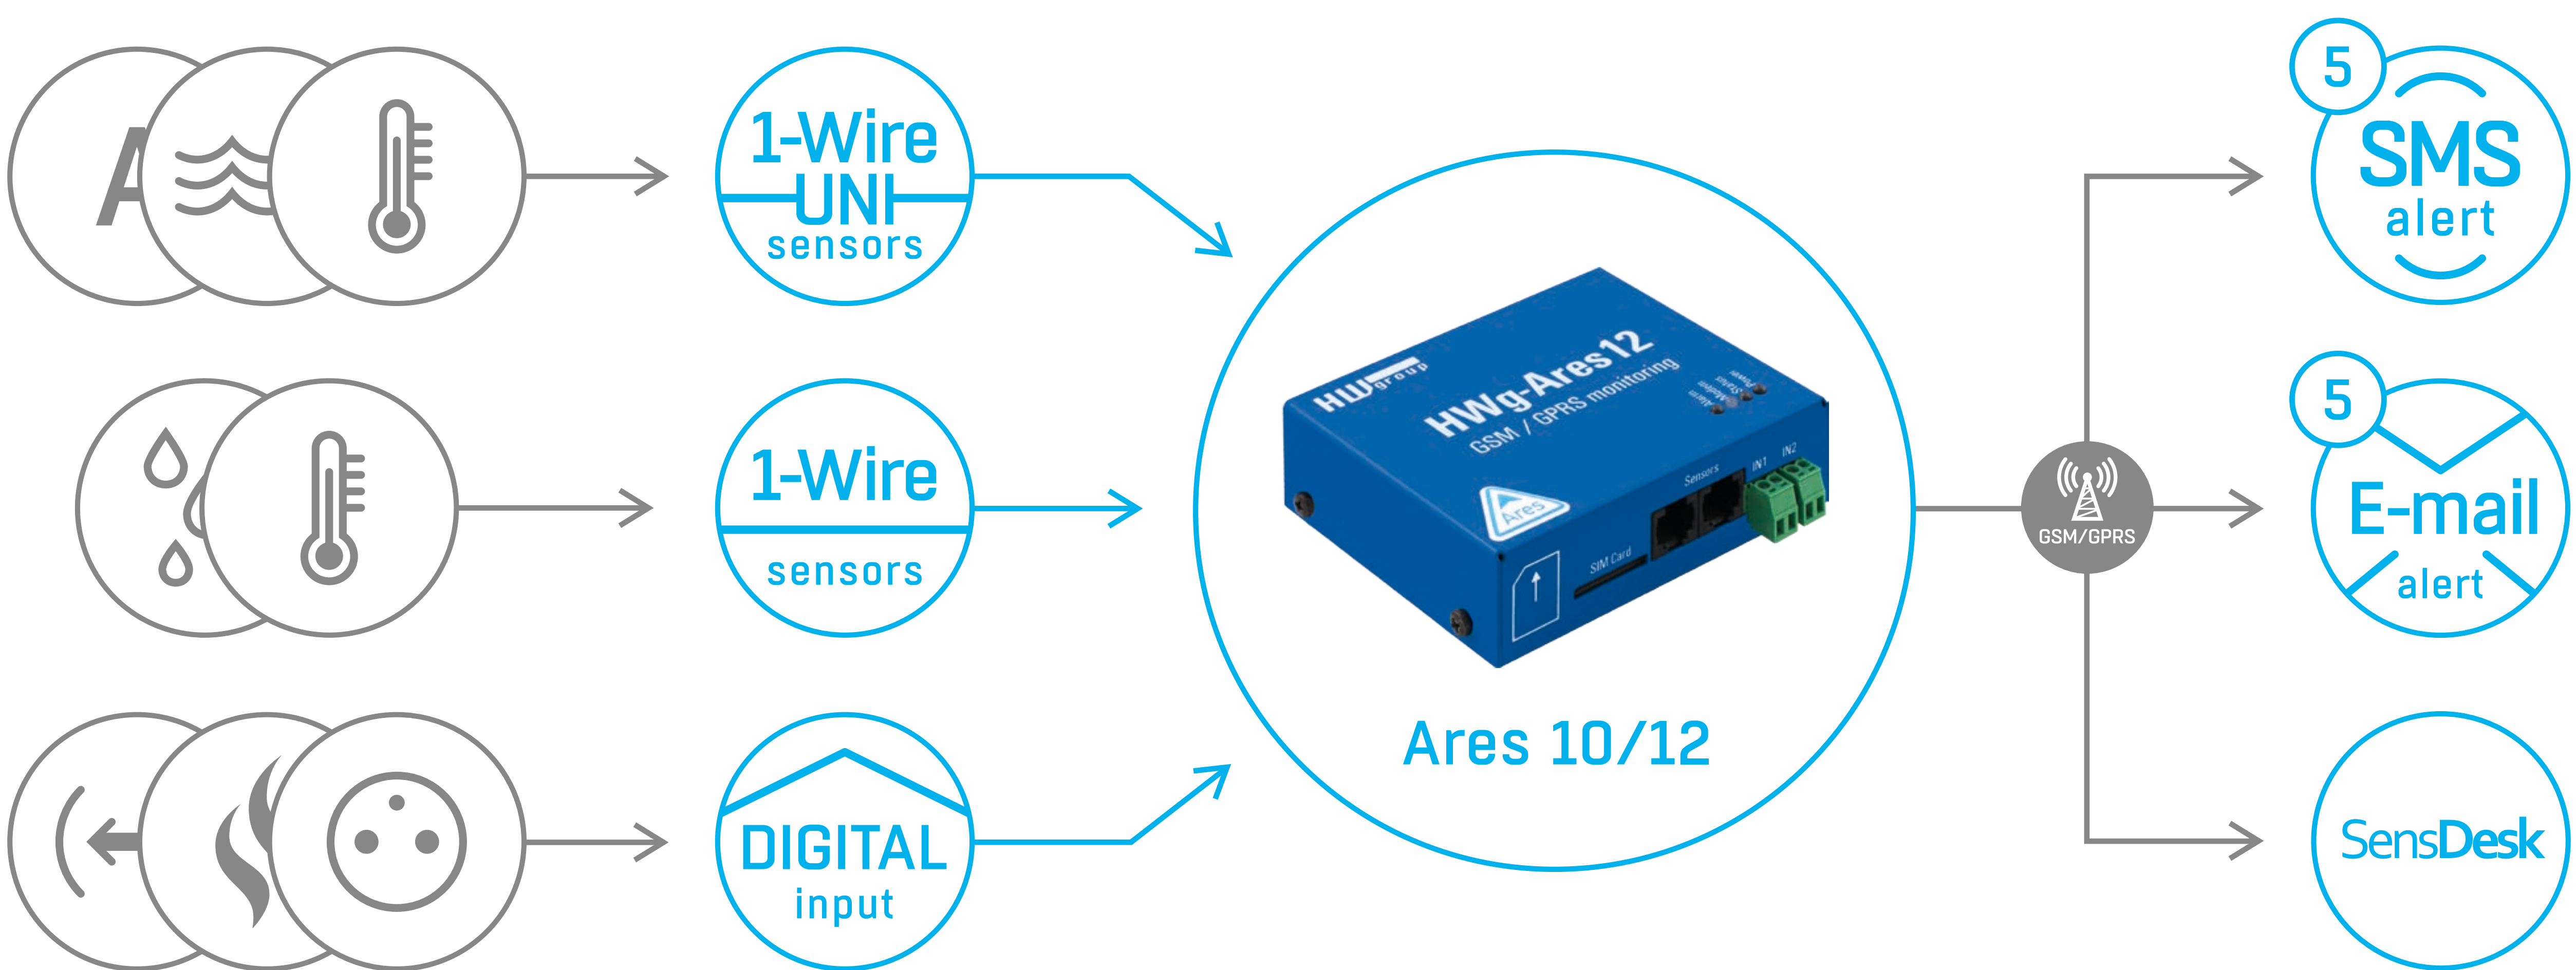

STE2
WiFi and Ethernet temperature and humidity sensor with digital inputs.

Ares 10/12

Ares monitors the readings of connected sensors. When a value reaches the alarm threshold, the device sends an e-mail or SMS or dials up to 5 pre-defined numbers.

Damocles2 2404
Secure industrial I/O device with PoE and Telco -48 V power options.

Damocles2 1208
Industrial I/O with enhanced IP security and DC connectors.

Damocles2 MINI
Smart I/O controlled over Ethernet.

STE2
WiFi and Ethernet temperature and humidity sensor with digital inputs.
