

SD devices

The SD family are 4 simple devices for monitoring of temperature, humidity, voltage, current and other parameters. They also detect water leaks, smoke, movement or open doors. The devices connect via Ethernet or WiFi to the SensDesk.com portal.

SD-2x1Wire

Up to four sensors of temperature, humidity, voltage, current and more...

SD-WLD

Water leak detection using a sensitive cable with a simple installation.

SD-2xIn

Two inputs for door contacts, motion, smoke, water, intrusion or fire detectors.

SD-2xOut

Can be controlled directly or using conditions from the SensDesk portal.
